

Help us make the journey better for everyone. This means:

- ❌ **Not parking or driving on the pavement.** Children are taught that the pavement is a safe place to be. Blocking the pavement, even if only half on, makes it difficult for those who do want to walk, especially for parents with pushchairs or wheelchairs.
- ❌ **Not parking on corners or within 10 metres of a junction.** This allows drivers and cyclists good visibility of approaching traffic.
- ❌ **Not parking on single or double yellow lines.** These restrictions are placed to keep the road safe for everyone.
- ❌ **Not stopping or dropping off on School Keep Clear yellow zigzags.** They are there to allow people to cross the road safely.
- ❌ **Not blocking dropped kerbs.** You are depriving people with pushchairs and wheelchairs of an accessible place to cross the road.
- ❌ **Not parking on grass verges.** This causes unsightly damage which can be costly to repair. Verges are usually legally included as part of the highway, so any parking restrictions on the road apply here too.
- ❌ **Not parking where you cause inconvenience to others.** This includes double parking, blocking residents' driveways and parking right outside someone's window.

What can I do instead?

Walking or cycling to school benefits everyone.

- Our children (and ourselves!) get regular exercise, and learn vital road safety and independent travel skills.
- Our local communities are not inconvenienced by lots of cars at peak times, and the air we breathe outside the school gates is cleaner.
- They also cost us much less money than driving.
- Cars and schools do not mix well. Children are often distracted when approaching or leaving school and this is when things can go badly wrong.

However, we recognise it is not always possible for families to walk or cycle all the way to school.

Try 'Park and Stride' - park away from the school entrance and walk the last 5 or 10 minutes. This disperses the cars and reduces the number in any one place to a safer level. Walking half a mile only takes between 8 and 15 minutes. How many calories you burn depends on how fast you walk!

Try a walking bus - organise a small group of parents to share the walk to school and take it in turns to do the school run. You could even combine this idea with Park and Stride.

Try car sharing - if you have to drive to school then get together with other parents who need to go by car and take it in turns to drive.

Always park so that children can get in or out on the kerb side of the car and not into the path of traffic. Teach them to be aware of other road users, including pedestrians and cyclists before opening the doors.

If you need to drive your child to school:

For the safety of your child, their friends, and the local community we ask that you park safely, legally and considerately around schools.

If local residents identify a problem in relation to parking issues outside or adjacent to a school – Wiltshire Police encourage the community to report those issues to the Area Board using the reporting system via the Wiltshire Council website.

**Safer & Smarter
Parking**

When children are walking or cycling to school, we know that parents are concerned about the danger from traffic. School gates should be safe places.
